THE CALD YOUTH CENSUS REPORT 2014

THE FIRST AUSTRALIAN CENSUS DATA ANALYSIS OF YOUNG PEOPLE FROM CULTURALLY AND LINGUISTICALLY DIVERSE BACKGROUNDS.

THE CALD YOUTH CENSUS REPORT 2014

Research undertaken by:

Australian Population and Migration Research Centre (APMRC), Geography, Environment and Population School of Social Sciences, University of Adelaide on behalf of the Multicultural Youth Advocacy Network (MYAN) Australia.

Authors

Professor Graeme Hugo Dr Kelly McDougall Dr George Tan Dr Helen Feist

Acknowledgements

As the commissioner of this report MYAN Australia would like to thank the University of Adelaide and the Australian Population and Migration Research Centre for their hard work producing this landmark report, the first time such a report has been produced in Australia. We would particularly like to extend our gratitude to the authors Professor Graeme Hugo, Dr Kelly McDougall, Dr George Tan and Dr Helen Feist for their expertise and commitment.

MYAN Australia would also like to thank Multicultural Youth South Australia (MYSA) and the Centre for Multicultural Youth (CMY).

Glossary and Abbreviations

ABS

Australian Bureau of Statistics

Australia born

This term refers to all persons who were born in Australia including those of CALD ancestry and Refugee ancestry.

CALD (Country)

Culturally and Linguistically Diverse backgrounds (see Appendix 1 for a list of identified CALD countries)

CALD Youth and CALD ancestry

This umbrella term is used interchangeably with CALD youth. CALD ancestry includes persons aged 12-24 in the following sub-groups:

- Persons born in a CALD country. See CALD born.
- 2nd generation Australian born descendants. This includes persons with at least one parent born in a CALD country and/or nominated a CALD country of ancestry during the 2011 census.
- Persons born in a refugee country. See Refugee born.
- Persons with Refugee ancestry. See Refugee ancestry.

CALD born

This term includes persons aged 12-24 who were born in a CALD country before migrating to Australia. This also includes persons in the Refugee born group

Overseas born

Persons born in a country other than Australia. This includes, but is not limited to, people who are classified as CALD born.

SA4

Statistical Area Level 4 are geographical areas that cover the whole of Australia without gaps or overlaps. SA4 regions are the largest sub-State regions in the Main Structure of the Australian Statistical Geography Standard (ASGS). Whole SA4s aggregate to Greater Capital City Statistical Areas and State and Territory. In regional areas, SA4s tend to have populations of between 100,000 to 300,000 people. In metropolitan areas, SA4s tend to have larger populations (300,000 – 500,000 people).

Refugee born¹

Persons aged 12-24 born in a country where the majority came to Australia through the refugee and humanitarian program. The definition of a refugee country for this report is based only on the countries that featured in the top 10 nationalities for Refugees on the offshore Humanitarian Program from 2001/02 to 2011/12 (see Appendix 2).

Refugee Ancestry¹

This includes persons aged 12-24 in the following sub-groups:

- 2nd generation Australian born descendants. This includes persons with at least one parent born in a refugee defined country and/or nominated a refugee defined country as their country of ancestry during the 2011 census.
- This includes persons in the Refugee born group.

¹ These are not defined Census categories. The MYAN would commonly use the term 'refugee backgrounds' to refer to young people who have settled in Australia through the Humanitarian Programme or who have parents who have settled in Australia through this Programme. The terms as used in this Report of 'refugee-born' and 'refugee-ancestry' refers to "refugee backgrounds". See Appendix 2 for a list of refugee countries.

Executive Summary – Overview of CALD Youth

According to 2011 census data some 925,015 people, or 25 percent of all youth aged 12-24 in Australia, are from a CALD background. This not only includes those born in a CALD country but also those who were born in Australia and have at least one parent born in a CALD country. The main body of the report compares characteristics of different sub-groups of Australian youth; the Australia born, overseas born, CALD born, refugee born, those with refugee ancestry and those with CALD ancestry (see glossary for a description of each of these terms). The CALD ancestry group is most inclusive and represents a CALD youth total. For clarity this section of the report provides a summary of the main characteristics of the overall CALD youth population in Australia. A more in-depth discussion around the implications relating to the characteristics of CALD youth are found in the main body of the report.

The distribution of CALD youth across Australian states and territories matches the distribution of Australia's total population; with the greatest number of CALD youth in New South Wales followed by Victoria and Queensland (see Table 1).

Table 1: Number of CALD youth aged 12-24 by state/territory, 2011

| | CALD youth total |
|--------------------|------------------|
| New South Wales | 340 812 |
| Victoria | 292 262 |

Source: ABS Census 2011, place of usual residence data

In all Australian states and territories the CALD youth population has grown at a faster rate over the past five years compared to the total and Australia-born population aged 12-24. The growth reflects immigration to Australia of youth from CALD countries, either within the 2006-2011 period or in a previous period for youth aged 12-24 years. This CALD youth group includes many different types of migrants including students, workers, family members of people already living in Australia and also a relatively small number of people who came to Australia as a humanitarian-migrant. This CALD youth group also includes Australia-born descendants of people who migrated to Australia from a CALD country.

Table 3: Average Annual Growth of Population aged 12-24 for the period 2006-2011 by state/territory and selected population groups

| | Total Population | Australia Born | CALD Youth Total |
|--------------------|------------------|----------------|------------------|
| New South Wales | 0.3 | 0.5 | 2.2 |
| Victoria | 1.1 | 0.7 | 3.4 |
| Queensland | 1.5 | 0.9 | 4.6 |
| South Australia | 0.6 | 0.0 | 3.1 |
| Western Australia | 2.0 | 0.9 | 4.4 |
| Tasmania | 0.0 | -0.1 | 3.3 |
| Northern Territory | 1.1 | 0.3 | 5.6 |
| ACT | 1.0 | 0.2 | 5.0 |
| Australia | 0.9 | 0.6 | 3.2 |

Source: ABS Census 2011, place of usual residence data

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

Characteristics of CALD youth

Education

Across all Australian states and territories, over 95 percent of CALD youth aged 12-17 are enrolled in full or part time education. The rate of enrolment is slightly below average in Queensland, Northern Territory, Western Australia and Tasmania and the rate of enrolment for this age group is higher in capital city areas compared to more regional and remote areas. Section 3 of the main body of this report shows the rate of enrolment in schooling for the CALD youth population aged 12-17 is higher than other population groups, including the Australia born youth population (93.5 percent of the Australia born youth population aged 12-17 are enrolled in schooling). There is a greater disparity in rates of enrolment in schooling for the CALD youth population aged 18-24 compared to the Australia born population of the same age. Some 58 percent of CALD youth aged 18-24 are enrolled in full or part time schooling compared to just 39 percent of the Australia born population. Rates of enrolment in schooling for 18-24 aged CALD youth vary by state/territory with much lower rates of enrolment in schooling in the Northern Territory and an above average proportion enrolled in the ACT.

Table 4: Proportion of CALD youth population aged 12-17 and 18-24 enrolled in full or part time schooling, all states and territories, 2011

| | Aged 12-17 | Aged 18-24 |
|--------------------|------------|------------|
| New South Wales | 96.2 | 59.6 |
| Victoria | 96.3 | 60.1 |
| Queensland | 93.8 | 51.6 |
| South Australia | 95.9 | 58.8 |
| Western Australia | 94.6 | 54.8 |
| Tasmania | 94.8 | 62.0 |
| Northern Territory | 94.3 | 35.0 |
| ACT | 97.5 | 67.2 |
| | | |
| Capital Cities | 96.3 | 61.3 |
| Rest of State | 93.7 | 42.0 |
| AUSTRALIA | 95.8 | 58.2 |

Source: ABS Census 2011, place of usual residence data

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

Employment

The workforce participation of migrant youth is one of the indicators used in the assessment of their economic contributions to Australian society. Table 5 shows the proportion of CALD youth and Australia born youth aged 18-24 who are employed across all Australian states/territories. Only the 18-24 age group was analysed in this section as they are more likely to be economically productive compared to the 12-17 age group. It is clear the CALD youth population has lower rates of employment compared to the Australia born population and that rates of

14

employment vary by state/territory. For CALD youth, the Northern Territory has the highest rates of employment (which helps to explain the low levels of school enrolment for this group) and Tasmania has the lowest rates of employment. Tasmania is also the state with the lowest rates of employment for Australia born youth while Western Australia is the state with the highest rate of employment for this group.

Table 5: Proportion of CALD youth and Australia born aged 18-24 employed full or part time, all states and territories, 2011

| | % Australia born | % CALD youth total |
|--------------------|------------------|--------------------|
| New South Wales | 69.5 | 54.6 |
| Victoria | 71.2 | 54.3 |
| Queensland | 73.5 | 58.5 |
| South Australia | 71.6 | 55.1 |
| Western Australia | 75.7 | 62.6 |
| Tasmania | 68.0 | 47.0 |
| Northern Territory | 62.2 | 74.4 |
| ACT | 79.5 | 58.4 |
| | | |
| Capital Cities | 72.6 | 54.5 |
| Rest of State | 70.3 | 63.3 |
| AUSTRALIA | 71.6 | 55.9 |

Source: ABS Census 2011, place of usual residence data

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

Living Arrangements

The living arrangements of CALD born and Australia born youth by age group are shown in Table 6.

Table 6: Living arrangements, Australia born and CALD born youth by age, Australia, 2011

| | % Austra | alia born | % CALE |) born |
|------------------------------|-----------|-----------|-----------|-----------|
| | Age 12-17 | Age 18-24 | Age 12-17 | Age 18-24 |
| Single family household | 93.8 | 76.8 | 90.8 | 60.5 |
| Two of more family household | 2.9 | 4.1 | 4.7 | 5.9 |
| Lone person household | 0.5 | 4.8 | 0.4 | 5.0 |
| Other/not stated | 2.8 | 14.3 | 4.1 | 28.6 |

Source: ABS Census 2011, place of enumeration data

Most people across age groups in both the Australia born and CALD born groups are living in a single family household, including over 90 percent of those aged 12-17. Although the proportion is small, CALD born youth have higher rates of living in multiple family households compared to the Australia born. The rates of living in a lone person household are about the same for CALD born and Australia born youth across age groups. Section 5 in the main body of this report explores living

CALD Youth Census / March 2014

arrangements by for each of these groups and the refugee born across all states and territories and compares capital city to rest of state areas.

This summary provides an overview of the CALD youth population as a whole. The remainder of this report looks more carefully at these demographic variables by the different CALD sub-groups outlined in the Glossary.

1. Introduction

Migration is a global phenomenon, one that includes adults, youth and children alike. Migration poses both opportunities and challenges for the migrants themselves, their families and also for the receiving countries. This is particularly applicable to migrants from Culturally and Linguistically Diverse (CALD) backgrounds and even more pertinent for a subset of this group, those who migrate as refugees or asylum seekers or have refugee ancestry.

This report considers both CALD migrant youth and those youth who identify as CALD through ethnic origin and ancestry. CALD youth for the purposes of this report refers to individuals living in Australia aged 12 to 24 years who identify as having a specific cultural or linguistic affiliation by virtue of their place of birth. We also refer to youth who identify as having a 'CALD ancestry' as those who have one or more parents born overseas and/or nominated a CALD country of ancestry at the point of the Australian census. A subset of these population groups is those individuals aged 12 to 24 years who are considered to have migrated as a refugee or have a refugee ancestry because at least one of their parents were of a refugee background and/or they nominated a refugee country of ancestry at the point of the census².

This brief report provides broad data on key demographics related to these population groups based on Australian Census data from 2011. The report looks at education, employment, and family and living arrangements for CALD and refugee youth and compares these data with that of the Australian born population aged 12 to 24 years. The report focuses on this information at the state level; however appendices show data for each sate by SA4 geographical boundaries to highlight finer spatial variations in population trends. The report is intended to provide a cursory look at key variables as a starting point to understanding the issues for the CALD youth population in Australia and where those issues are most likely to be felt.

Cultural diversity provides Australia with a vibrant society and a number of advantages; however children and young people from CALD backgrounds may face a number of issues that make them a vulnerable social group. CALD youth are a highly diverse group and their specific issues and challenges may differ depending on the particular cultural group with which they identify; the number of years they have been in Australia; their pathways both to Australia and once residing in Australia, and the level of community and family support they receive once they are living in Australia. This is particularly the case for those CALD youth from a refugee background.

While those entering the country may have chosen to migrate here, others may be escaping war, conflict or famine and may be doing so with some of their family members or alone. People who arrive under Australia's Humanitarian Program display considerable personal courage, often having to overcome extraordinary hardship and traumatic situations. For young people and their families arriving

¹ For a list of all countries identified as being Culturally and Linguistically Diverse please see Appendix One

² It is not possible to identify populations by visa category using the ABS Census data, for a list of the identified 'Refugee countries' used in this report and the methodology for defining them, please see Appendix Two

in Australia as refugees can be seen as both a challenging and momentous occasion. Following their arrival into a new country, both migrants and refugees experience a number of challenges. For CALD children and young people this may include difficulty integrating into mainstream Australian culture, or balancing their traditional family values and cultural beliefs with those of their adopted country, and language barriers that can exacerbate these integration challenges.

Gaining and retaining employment is one example of how language barriers can result in CALD and refugee youth becoming socially isolated. ABS data suggests that compared with recent migrants from a mainly English-speaking culture, migrants from a non-English-speaking culture were less likely to be employed and many of these cited language difficulties as being a major barrier to finding work. English proficiency among migrants was also linked to higher incomes and higher levels of education. In turn, these outcomes have an impact on a young person's ability to integrate into mainstream Australian culture, as those with English proficiency have the means to more fully participate and engage with their local community.

In spite of a higher proportion of CALD young people living in Australian capital cities compared with the general Australian population, research has found that they have a lower rate of health service utilisation. Aside from formal sources of assistance such as health services, informal sources of support including family, friends and neighbours are also important. However, due to the language barriers faced by those from non-English speaking backgrounds, CALD persons are also more likely to report having no support sources available compared with the non-CALD Australian population and those born in English-speaking countries. Even those who do not experience language barriers may have difficulty finding and accessing services that are culturally appropriate. This is particularly pertinent in regional communities that may have very few if any services catering to those from a CALD background. This includes access to translating and interpreting services for those with language difficulties or access to appropriate service providers. Negative experiences such as cultural insensitivity or a failure for CALD young people to find an appropriate service for their needs may result in some young people deciding not to seek help in the future.

In 2013 Dr. David Corlett, speaking at a two-day forum on refugee youth, called for a national framework for the care and support of children and young people who come to Australia as asylum seekers and refugees. In order to address any issues facing children and young people in the asylum and settlement contexts and the sectors supporting them, it is important to have better data collection on these population groups and a better understanding of the importance of a specialist or targeted approach in mainstream youth programs. This report contributes to that baseline knowledge about CALD and refugee youth in Australia.

2. CALD and Refugee Youth in Australia

According to the 2011 Australian Census, there are nearly 3.7 million youth aged 12-24 living in Australia.

- The majority of this group is made up of people born in Australia (2.9 million), however this group includes a large number of 2nd generation CALD youth, those youth born in Australia who identify as having a CALD ancestry because one or both parents were born in a CALD and/or refugee country.
- Nearly 600,000 youth in Australia aged 12-24 were born overseas which includes over 400,000, or almost 11 per cent, born in a CALD country (see Table 7).
- Included in the CALD born group is a subset of over 48,000 'refugee born', which refers to those born in a country where the majority came to Australia through the refugee and humanitarian program³.

It is important to note that for the following tables the refugee born and refugee ancestry groups are subsets of the CALD born and CALD ancestry groups and therefore figures are not directly comparable across these groups. The column to the right of each table "CALD ancestry" includes all other subset categories, including CALD born, Refugee born and Refugee ancestry and thus in effect represents a CALD Youth Total.

Table 7: Number of persons 12-24 by state/territory for selected population groups, 2011

| | Total Population | Australia born | Overseas born | CALD born | Refugee born | Refugee ancestry ¹ | CALD ancestry |
|-----------------------|---------------------|-------------------|------------------|--------------|-----------------|----------------------------------|------------------|
| New South Wales | 1 155 071 | 913 986 | 182 155 | 141 573 | 15 970 | 33 696 | 340 812 |
| Victoria | 917 120 | 715 370 | 159 542 | 128 260 | 15 363 | 30 940 | 292 262 |
| Queensland | 760 978 | 605 194 | 115 040 | 58 206 | 4 658 | 7245 | 120 806 |
| South Australia | 267 775 | 221 015 | 36 000 | 26 690 | 4 638 | 6021 | 61 902 |
| Western Australia | 394 757 | 286 723 | 84 076 | 44 684 | 6 354 | 9513 | 80 450 |
| Tasmania | 81 779 | 73 429 | 5 237 | 3 740 | 618 | 816 | 7 163 |
| Northern Territory | 40 608 | 33 170 | 4 022 | 2 875 | 348 | 277 | 5 258 |
| ACT | 67 341 | 53 086 | 10 980 | 8 695 | 562 | 1 355 | 16 362 |
| AUSTRALIA | 3 685 429 | 2 901 973 | 597 052 | 414 723 | 48 511 | 89 863 | 925 015 |

¹ Care must be taken when analysing Refugee Ancestry over time as the following ancestries were not reflected in the 2006 Census: Burundian, Bhutanese, Chin, Congolese and Rohingya.

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry and Refugee Ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

Source: ABS Census 2011, place of usual residence data

Table 8 shows the top 10 birthplace countries for CALD born youth aged 12-24. All countries represented on this list are Asian countries, with the exception of Iraq at number 10. China is the most common country of birth by far, with nearly double the number of CALD youth born in China compared to the next largest birthplace, India.

Table 8: Top 10 Birthplaces of CALD born youth aged 12-24

| | Number | % |
|----------------------------|--------|-------|
| China | 76045 | 18.3 |
| India | 39996 | 9.6 |
| Philippines | 23176 | 5.6 |
| Malaysia | 21594 | 5.2 |
| Hong Kong (SAR of China) | 15795 | 3.8 |

| Indonesia | 12781 | 3.1 |
| Singapore | 10667 | 2.6 |
| Iraq | 9879 | 2.4 |
| Other CALD countries | 175850 | 40.0 |
| Total CALD born youth | 415965 | 100.0 |

Source: ABS 2011 Census

Reflective of the top 10 countries of birth, Chinese languages Mandarin and Cantonese are two of the top 10 languages spoken at home by CALD born youth (Table 9). It is noted that English is the second most commonly spoken language at home for CALD born youth; however the number of CALD born youth who speak English at home represents only 15 percent of the total CALD born youth population in Australia. There is great diversity in the languages spoken at home by CALD born youth, with 221 different languages or dialects represented overall.

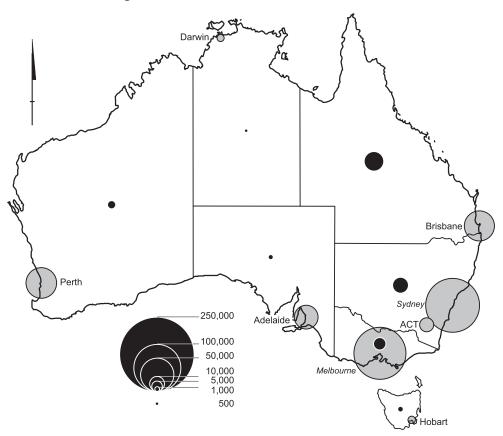

Table 9: Top 10 Languages spoken at home for CALD born youth aged 12-24

| | Number | % |
|-----------------------|--------|-------|
| Mandarin | 74163 | 17.8 |
| English | 62875 | 15.1 |
| Cantonese | 26643 | 6.4 |
| Arabic | 20851 | 5.0 |
| Vietnamese | 15998 | 3.8 |
| Korean | 13075 | 3.1 |
| Punjabi | 12607 | 3.0 |
| Hindi | 11526 | 2.8 |
| Indonesian | 10055 | 2.4 |
| Tagalog | 9329 | 2.2 |
| Total other languages | 158843 | 38.2 |
| Total CALD born youth | 415965 | 100.0 |

Note: a total of 221 language spoken at home are represented within the CALD born youth population Source: ABS 2011 Census

Table 7 showed the number of persons aged 12-24 who are Australia born, overseas born, CALD born, refugee born and of CALD and/or refugee ancestry for all Australian states and territories⁴. Not surprisingly, states and territories with largest overall population size, such as New South Wales, Victoria and Queensland, also have a larger number of CALD born and refugee born youth. This is also apparent when looking at the Figure 1 which shows the distribution of CALD born youth in capital cities across Australia and the rest of state areas⁵. Just like Australia's population as a whole, a much greater number of people from all birthplace and ancestry groups live near capital cities compared to rest of state areas; however the concentration in capital city areas is even greater for some CALD population groups.

Figure 1: Australia Greater Capital Cities and Rest of State: Distribution of Total CALD-born Aged 12-24, 2011

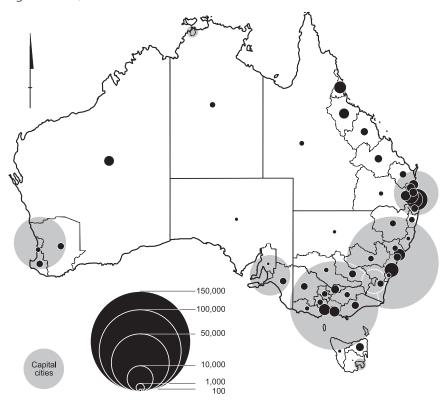

Source: ABS 2011 Census

Figure 2 and Figure 3 show the distribution of non-English speaking born and non-English speaking ancestry youth. Non-English speaking country birthplace here refers to both CALD born and Refugee born population groups. Figure 2 and Figure 3 show youth born in a non-English speaking country and/or who nominate a non-English speaking country of ancestry are highly concentrated around capital city areas, particularly the larger capitals of Sydney and Melbourne, in line with the Australian born population.

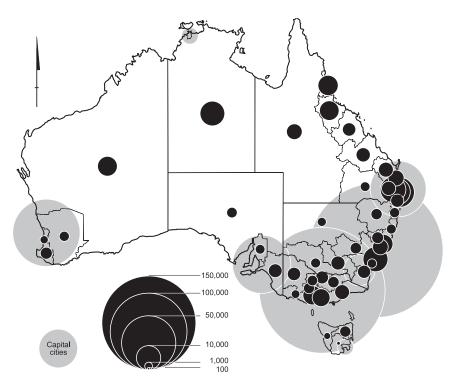

⁴ See Appendices for the information by SA4 area level for each state and territory.

Figure 2: Australia: Capital Cities and SA4s: Distribution of CALD Birthplace Aged 12-24, 2011

Source: ABS 2011 Census

Figure 3: Australia: Capital Cities and SA4s: Distribution of CALD Ancestry Aged 12-24, 2011

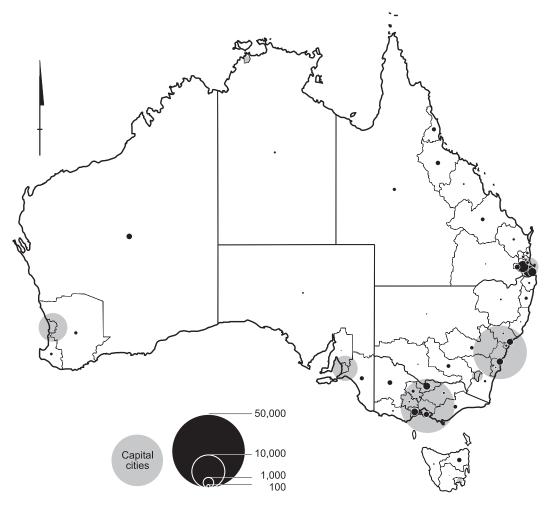

Source: ABS 2011 Census

Refugee Born Youth

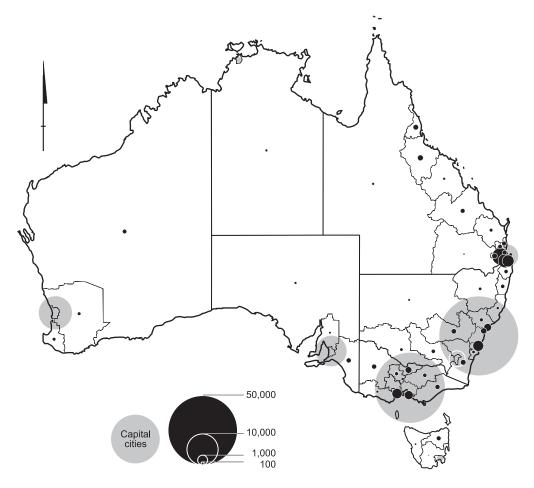

Figure 4 and Figure 5 show a similar distribution pattern for the refugee country born and refugee country ancestry youth across the SA4 areas of Australia, with settlement numbers higher in urban regions.

Figure 4: Australia: Capital Cities and SA4s: Distribution of Refugee Country of Birth Aged 12-24, 2011

Source: ABS 2011 Census

Figure 5: Australia: Capital Cities and SA4s: Distribution of Aged 12-24, 2011

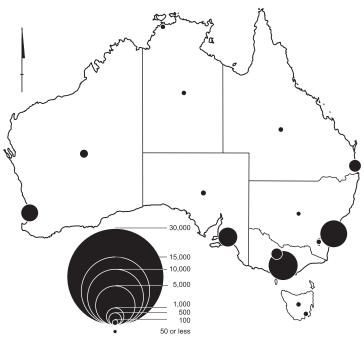

Source: ABS 2011 Census

Figure 6 to Figure 11 show the distribution of selected refugee-born birthplace groups for youth aged 12-24 across capital city and rest of state areas. For most of the birthplace groups illustrated in these maps, Sydney and Melbourne are the main locations of residence however it is interesting to note that the distribution does vary between population groups.

For youth born in Afghanistan, shown in Figure 6, the largest population numbers are living in Melbourne and Sydney with a substantial number also living in rest of state areas of Victoria. Compared to Adelaide and Perth only a small number of youth born in Afghanistan live in Hobart. Interestingly the population numbers for this group in Adelaide and Perth are also larger than for Brisbane.

24

Figure 6: Australia: Capital Cities and Rest of State: Distribution of youth born in Afghanistan aged 12-24, 2011

Source: ABS 2011 Census

When compared to youth born in Afghanistan, as seen in Figure 6, the youth born in Iran, Figure 7, are also living in greater numbers in Sydney and Melbourne. However, the distribution of population between Melbourne and Sydney is less even in the youth born in Iran population, with a more even population distribution between Perth, Adelaide and Brisbane. Population numbers are still small for Hobart and only a very small number of youth born in Iran are living outside of capital city areas.

Figure 7: Australia: Capital Cities and Rest of State: Distribution of youth born in Iran aged 12-24, 2011

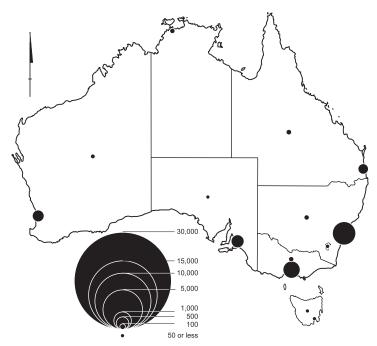

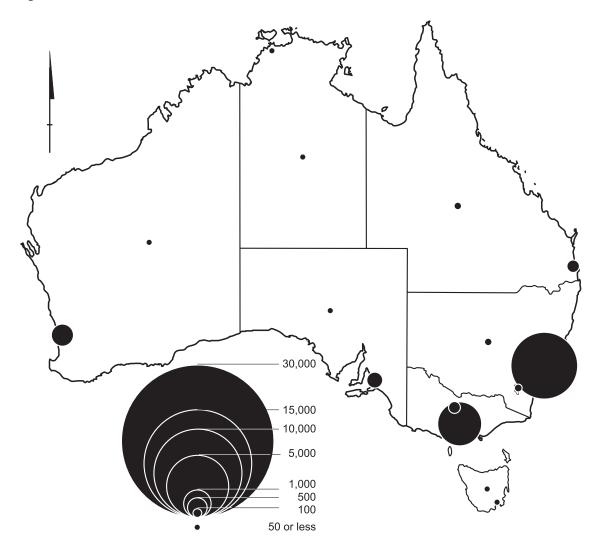

Figure 8 shows youth born in Iraq, who are highly concentrated in Sydney followed by Melbourne, with Perth having a greater share of the remaining population.

Again, relative to those living in greater capital city areas only a very small number of youth born in Iraq are living in rest of state areas.

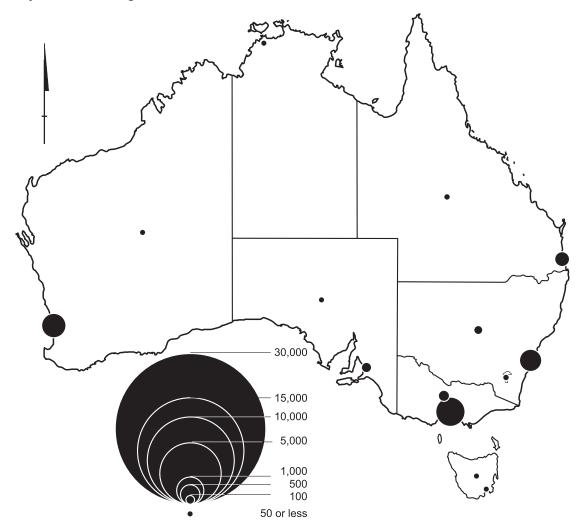

Figure 8: Australia: Capital Cities and Rest of State: Distribution Iraq-born Aged 12-24, 2011

Source: ABS 2011 Census

Interestingly, the greatest number of youth born in Burma (Myanmar) aged 12-24 are living in Melbourne followed by Perth and Sydney, with only small numbers residing in Adelaide, as shown in Figure 9.

Figure 9: Australia: Capital Cities and Rest of State: Distribution Burma (Myanmar)-born Aged 12-24, 2011

Source: ABS 2011 Census

The distribution of youth born in Congo shown in Figure 10 is an interesting case where this group is much less concentrated in capital city areas. In fact in New South Wales there are a greater total number of youth born in Congo aged 12-24 living in rest of state areas compared to Sydney greater capital city area. The capital city area with the largest number of youth born in Congo is Adelaide, followed by Brisbane and Perth.

Figure 10: Australia: Capital Cities and Rest of State: Distribution Democratic Republic of Congo-born Aged 12-24, 2011

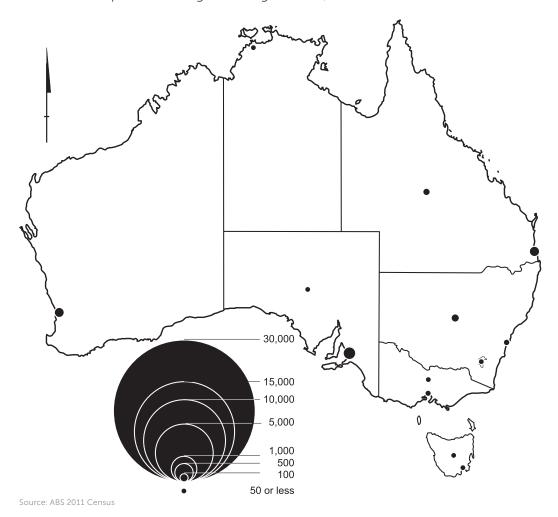

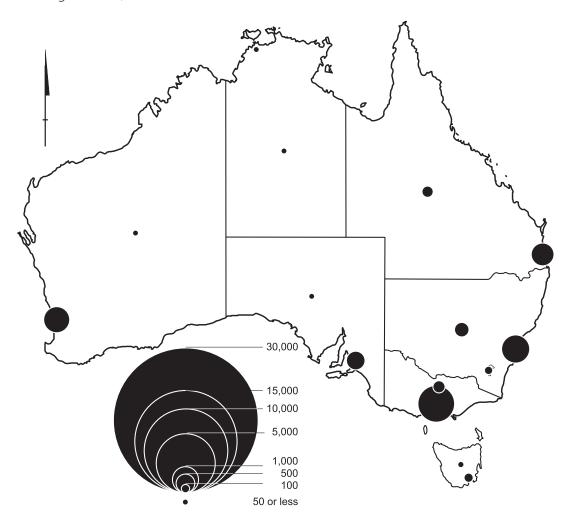

Figure 11 shows the greatest number of youth born in Sudan are living in Melbourne followed by a fairly even distribution in Sydney, Perth and Brisbane. Rest of State regions in NSW, Qld and Victoria also have reasonably large population numbers. Examination of this birthplace data by SA4 geographical areas would give a better understanding of the Rest of State distribution.

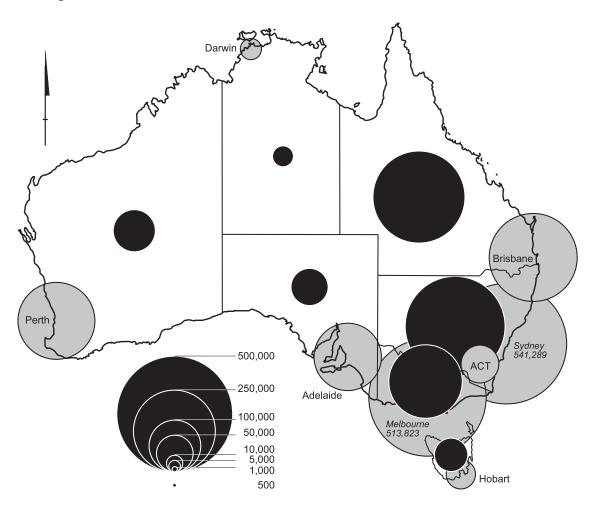

Figure 11: Australia: Capital Cities and Rest of State: Distribution Sudanborn Aged 12-24, 2011

Source: ABS 2011 Census

As a basis for comparison with other youth birthplace groups, Figure 12 shows the distribution of youth born in Australia aged 12-24 across capital city and rest of state areas of Australia. Figure 12 highlights the more even distribution of youth across urban and rural/regional areas of Australia than for youth born in CALD countries. What this suggests is that CALD youth in rural and regional Australia are likely to form a more marked minority group than in urban Australia.

Figure 12: Australia: Capital Cities and Rest of State: Distribution Australiaborn Aged 12-24, 2011

Source: ABS 2011 Census

Table 10 shows the average annual growth of the youth population aged 12-24 across different birthplace and ancestry groups for each state/territory and Australia as a whole from 2006 to 2011. Looking first as the rates of average annual growth over this period for all of Australia, it is clear that the overseas born youth population grew at a faster rate than Australia born youth in the 2006 to 2011 period; 0.6 percent and 4.4 percent respectively. The growth reflects immigration to Australia of youth from CALD countries, either within the 2006-2011 period or in a previous period for youth aged 12-24 years. This CALD overseas born youth group includes many different types of migrants including students, workers, family members of people already living in Australia and also a relatively small number of youth who came to Australia through the refugee and humanitarian program. While actual population numbers for youth born in refugee countries were small (see Table 7) the average annual rates of growth for youth born in refugee countries in the period (5.6%) was higher than for youth born in Australian, youth born overseas and youth born in CALD countries and the total population aged 12-24 years.

Table 10: Average Annual Growth of Population aged 12-24 for the period 2006-2011 by state/territory and selected population groups

| | Total Population | Australia born | Overseas born | CALD born | Refugee born | Refugee ancestry¹ | CALD ancestry |

Source: ABS Census 2011, place of usual residence data

Rates of average annual growth for each population group vary by state as shown in Table 10. The Northern Territory stands out with very high rates of average annual growth for youth born overseas, youth born in CALD countries and youth born in refugee countries and the youth with refugee ancestry population groups from 2006-2011. However, it is important to consider that despite this more rapid growth, the overall number of youth born overseas in the Northern Territory in 2011 is still much lower than most other states and territories (see Table 7). Also of note are the significant increases in Queensland, South Australia and Western Australia who registered average growth rates which were nearly double or more than double the average annual rate of growth for all of Australia for youth born in

refugee countries in this period. Further analysis of policy settlement strategies and patterns by states is needed to understand this growth in the less populated states of Australia.

Table 11 and Table 12 show a gender breakdown for the different country of birth and ancestry youth groups across the 12-17 and 18-24 age groups for all Australian states and territories and capital cities and rest of state areas⁶. In Australia, as for all global population groups, there are naturally a slightly greater number of male births, and thus an overall greater number of males compared to females in younger age groups. Within most of the birthplace and ancestry groups compared in Table 11 and Table 12, the number of males and females in each area are approximately equal. An exception is the Northern Territory, where the number of male youth born in refugee countries in both the 12-17 and 18-24 age groups greatly outnumbers female youth born in refugee countries. For youth born in refugee countries aged 18-24, there are also a substantially lower number of females living outside of capital cities.

Table 11: Number of males and females aged 12-17, Australia born, CALD born and CALD ancestry, refugee born and refugee ancestry groups, all states and territories, 2011

| | Australia born | | CALD | born | Refugee born | | Refugee ancestry | | CALD ancestry | |

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry and Refugee Ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

This section of the report highlights the variations that exist in the different CALD and Refugee population groups despite an overall trend towards large numbers in the typical 'gateway' cities of Melbourne and Sydney. Further examination of the links between policy and settlement decisions within the CALD and Refugee population groups is needed to fully understand these variations.

3. Education

Education is an essential part of successful integration for migrant and refugee youth and is crucial for preparing youth of all backgrounds to be productive and well-adjusted members of society. School structures and age requirements for student enrolment in Australia differ between the States and Territories. Since 2010 students were required to continue their education until 17, either at school or through some combination of training and employment in most Australian states and territories, therefore it is expected that most youth aged 12-17 will be represented in census data either as a full time or part time student.

Table 13 shows that for all of Australia, over 90 percent of the youth population aged 12-17 for all birthplace and ancestry groups are a full or part time student. The rate is highest for youth born in CALD countries and/or those who have CALD ancestry and lowest overall for youth born in refugee countries aged 12-17 years.

Table 13: Proportion of population aged 12-17 enrolled in full or part time schooling, all states and territories for selected population groups, 2011

| | % Australia born | % CALD born | % Refugee born | % Refugee ancestry | % CALD ancestry |
|--------------------|------------------------|----------------|----------------------|--------------------------|-----------------|
| New South Wales | 94.3 | 95.8 | 93.5 | 95.4 | 96.2 |
| Victoria | 95.2 | 95.6 | 91.9 | 94.9 | 96.3 |
| Queensland | 91.3 | 94.8 | 92.5 | 93.5 | 93.8 |
| South Australia | 94.5 | 94.7 | 93.4 | 94.3 | 95.9 |
| Western Australia | 91.0 | 95.2 | 92.5 | 94.1 | 94.6 |
| Tasmania | 92.8 | 94.9 | 94.9 | 95.0 | 94.8 |
| Northern Territory | 84.0 | 85.4 | 40.4 | 90.7 | 94.3 |

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry and Refugee Ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

Compared to other states and Australia as a whole, rates of being a full or part time student are lowest for all birthplace and ancestry groups in the Northern Territory, but the low rates of student status are particularly striking for youth born in refugee countries in this area. Referring to Table 7 in the previous section of this report there are only a small number of youth born in refugee countries aged 12-17 are living in the Northern Territory (156 people); however the low rate student status is still a concern. Rates of being a full or part time student are also slightly higher for all birthplace and ancestry groups living within greater capital city areas compared to those living in rest of state areas.

Table 14 shows rates of student status for the older half of the youth group, those aged 18-24. Enrolment in schooling includes attendance at any type of educational institution including TAFE, university and secondary school. It is clear that rates of being a full time or part time student are much lower for this older age group compared to those aged 12-17, a reflection of the fact that many youth in the 18-24 age cohort have completed their education and are engaged in the workforce.

Table 14: Proportion of population aged 18-24 enrolled in full or part time schooling, all states and territories for selected population groups, 2011

| | % Australia born | % CALD born | % Refugee born | % Refugee ancestry | % CALD ancestry |
|--------------------|------------------------|----------------|----------------------|--------------------------|-----------------|
| New South Wales | 43.3 | 65.7 | 57.7 | 57.2 | 59.6 |
| Victoria | 45.6 | 67.2 | 56.6 | 53.8 | 60.1 |
| Queensland | 31.5 | 64.0 | 56.1 | 56.2 | 51.6 |
| South Australia | 37.3 | 72.2 | 63.0 | 60.9 | 58.8 |
| Western Australia | 32.4 | 63.5 | 54.2 | 54.1 | 54.8 |
| Tasmania | 33.5 | 77.5 | 76.3 | 73.7 | 62.0 |
| Northern Territory | 15.8 | 39.8 | 31.2 | 43.3 | 35.0 |
| ACT | 49.5 | 76.0 | 58.1 | 55.1 | 67.2 |
| | | | | | |
| Capital Cities | 46.2 | 67.8 | 57.7 | 56.5 | 61.3 |

| AUSTRALIA | 39.4 | 66.3 | 57.3 | 56.0 | 58.2 |

Source: ABS Census 2011, place of usual residence data

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry and Refugee Ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

Comparing across birthplace and ancestry groups for all of Australia, youth born in Australia aged 18-24 have much lower rates of full time or part time student status compared to other groups; just under 40 percent of all Australia born youth aged 18-24 are a full time or part time student compared to 66 percent of youth born in CALD countries and 57 percent of youth born in refugee countries aged 18-24. It must be remembered that these figures include a large number of youth born in CALD countries aged 18-24 who have come to Australia as international students. This may also be an indication that it is more difficult for youth born in CALD and refugee countries in this young adult age group to find employment or full-time employment compared to youth born in Australia.

Comparing student rates across states and territories, again the Northern Territory stands out with student rates that are much lower for all groups compared to other states. It will be shown in the next section that there is an inverse relationship with student status and employment for some groups and this is especially apparent in the Northern Territory where rates of employment for youth born in CALD countries, youth with CALD ancestry and youth with refugee ancestry are above the average for Australia (see Table 15). This means that for these birthplace and ancestry groups, a greater proportion of youth aged 18-24 living in the Northern Territory are employed rather than studying. This pattern of employment rates for particular birthplace and ancestry groups reflecting student status is also apparent

in other states and territories.

Student status rates for youth with CALD ancestry and refugee ancestry fall somewhere between that of Australia's overall youth population and respective birthplace groups. This is not surprising as these ancestry groups include many youth who are Australia born yet retain cultural linkages and identifications with a CALD or refugee country.

4. Employment

The workforce participation of migrant youth is one of the indicators used in the assessment of their economic contributions to Australian society. Table 15 compares employment status of youth born in CALD countries and youth born in refugee countries aged 18-24 years with youth born in Australia. Only the 18-24 age group were included in the analysis in this section, as they are more likely to be economically productive compared to the 12-17 age group.

Overall, it is clear that youth born in CALD and refugee countries have lower levels of workforce participation when compared to their Australia born counterparts. As shown in Table 15 under half of the youth born in CALD countries (44.5%) and one-third of youth born in refugee countries (33.2%) compared with 71.6 percent of youth born in Australian were employed in full or part-time employment. However, the data suggests that this gap narrows for second-born generations with higher rates of workforce participation for youth with CALD and refugee ancestry. This finding is in line with existing research (Hugo 2011)⁷ which highlights the propensity of particularly second generation migrants engaging with the workforce.

Table 15: Proportion of population aged 18-24 employed full or part time, selected population groups, all states and territories, 2011

| | % Australia born | % CALD born | % Refugee born | % Refugee ancestry | % CALD ancestry |
|--------------------|------------------------|----------------|-------------------|-----------------------|-----------------|
| New South Wales | 69.5 | 44.6 | 34.6 | 51.9 | 54.6 |
| Victoria | 71.2 | 42.7 | 32.4 | 47.4 | 54.3 |
| Queensland | 73.5 | 46.0 | 35.4 | 47.8 | 58.5 |
| South Australia | 71.6 | 36.7 | 27.0 | 37.3 | 55.1 |
| Western Australia | 75.7 | 52.2 | 35.2 | 49.3 | 62.6 |
| Tasmania | 68.0 | 29.6 | 22.3 | 26.8 | 47.0 |
| Northern Territory | 62.2 | 62.9 | 25.9 | 60.7 | 74.4 |
| ACT | 79.5 | 46.6 | 40.8 | 59.7 | 58.4 |
| | | | | | |
| Capital Cities | 72.6 | 44.1 | 33.8 | 48.9 | 54.5 |
| Rest of State | 70.3 | 47.2 | 29.5 | 48.0 | 63.3 |
| AUSTRALIA | 71.6 | 44.5 | 33.2 | 48.8 | 55.9 |

Source: ABS Census 2011, place of enumeration data

Note: The figures for the Australian Born population groups includes all people born in Australia, including those with a CALD ancestry and Refugee Ancestry; therefore these categories are not mutually exclusive. Comparisons should be made across states, not across population groups.

It is noted that while CALD youth, including refugee youth, might face discrimination and obstacles relating to the 'refugee gap', their relatively lower rates of employment to some extent, is also linked to an emphasis on their education as shown in their higher levels of attendance at an educational institution in Table 14. This link with a higher proportion in the workforce and lower proportion enrolled in an education institution for migrant youth is substantiated in the Northern Territory. Apart from youth born in refugee countries in the Northern Territory, the remaining CALD and refugee population groups demonstrate comparable levels of workforce participation with youth born in Australia; and conversely lower levels of enrolment in an educational institution as shown in Table 14.

Comparing across the state level reveals that migrant youth in South Australia and Tasmania performed below the national average with relatively lower levels of workforce participation for youth born in both CALD and refugee countries. Youth born in Australia living in South Australia and Tasmania were twice more likely than youth born in CALD and refugee countries to participate in the workforce. However, again, when comparing the levels of enrolment in an education for the above groups, South Australia and Tasmania performed better than the national average which suggests that that there is more of an emphasis placed on education for youth born in both CALD and refugee countries compared to the other States. This may be related to more attractive education programs for international students in these states. This is also repeated for youth with refugee ancestry as well. Youth with a CALD ancestry in Tasmania also experienced lower levels of workforce engagement however, South Australia performed better in this group with comparable levels of employment when compared with the national average.

Overall, there is a higher proportion engaging in the workforce in capital cities than in rest of state areas. While this pattern prevails for youth born in Australia, refugee countries and those with refugee ancestry, it is noted that youth born in CALD countries and those with CALD ancestry tend to be more active in the workforce outside of capital cities than in capital cities. This can be explained by counter-urbanisation patterns whereby over time, the internal migration of immigrants begins to resemble that of the Australia born population, but also, through the increasing trend, both in Australia and globally, of new immigrants settling outside of traditional 'gateway cities'. In Australia this is partly due to regional migration policy initiatives as well as job shortages in regional Australia.

5. Living Arrangements

Examining living arrangements or household composition of different CALD youth population groups allows us to understand how CALD youth, including youth born in refugee countries, live compared to their Australia born counterparts. This will shed some light on the housing experiences and needs of all migrant youth. Table 16 compares the proportion of youth born in Australia, youth born in CALD countries and youth born in refugee countries aged 12-17 and 18-24 years living in a single family household. Table 17 and Table 18 compare these population groups living alone and living in multiple family households respectively.

On a whole, as Table 16 shows, the majority of youth born in CALD and refugee countries live in single family households for the 12-17 and 18-24 age groups. As expected, this is particularly high for the 12-17 age groups. The proportion of youth born in CALD and refugee countries aged 12-17 years who live in single family households is comparable to youth born in Australia. This is linked to the higher levels of dependence of youth in this age category on their families as they tend to be still at school (Table 13) and continue to live at home.

Table 16: Proportion of persons living in a single family household, by age for Australia born, CALD born and Refugee born population groups, all state and territories, 2011

| | Youth aged 12-17 | | | Youth aged 18-24 | | |
|--------------------|------------------------|----------------|-------------------|------------------------|----------------|-------------------|
| | % Australia born | % CALD born | % Refugee born | % Australia born | % CALD born | % Refugee born |
| New South Wales | 93.6 | 91.1 | 91.3 | 79.0 | 64.7 | 80.7 |
| Victoria | 95.5 | 90.3 | 89.7 | 79.1 | 59.0 | 77.9 |
| Queensland | 92.8 | 90.1 | 89.2 | 73.1 | 56.8 | 76.9 |
| South Australia | 95.4 | 90.7 | 88.8 | 78.4 | 56.3 | 76.8 |
| Western Australia | 93.1 | 92.6 | 88.9 | 76.2 | 63.2 | 74.4 |
| Tasmania | 95.2 | 87.6 | 95.8 | 75.5 | 44.3 | 76.5 |
| Northern Territory | 74.9 | 79.3 | 46.4 | 54.2 | 56.5 | 37.6 |
| ACT | 94.6 | 93.0 | 86.2 | 67.5 | 46.5 | 70.7 |
| | | | | | | |
| Capital cities | 94.7 | 91.3 | 91.5 | 78.9 | 61.1 | 81.2 |
| Rest of state | 92.9 | 88.5 | 91.7 | 74.1 | 55.6 | 77.6 |
| Total Australia | 93.8 | 90.8 | 91.5 | 76.8 | 60.5 | 80.8 |

Source: ABS Census 2011, place of enumeration data

For the 18-24 age group, approximately three-quarters (77%) of youth born in Australia live in single family households, however, this was higher for youth born in refugee countries at 81 percent. This rate was noticeably lower for youth born in CALD countries at 61 percent.

The higher rate for youth born in refugee countries living in a single family household in the 18-24 age group might be attributed to cultural aspects whereby some cultures (e.g. Sudanese) expect children to remain with their families until

adulthood or marriage. While it can be argued that this may also be applicable to youth born in CALD countries, there is a lower proportion of youth aged 18-24 years born in CALD countries living in single family households and a significantly higher proportion living in group households (23% of youth born in CALD countries compared to 10% of youth born in Australia living in group households). This is partly attributable to the high number of youth from CALD countries who are international students, working holiday makers and skilled migrants living in Australia. These cohorts of migrants are generally in the 18-24 year age group, are generally in Australia without their families and may choose to live in affordable share housing.

It is noted in Table 17 that when compared to youth born in Australia and CALD countries, youth born in refugee countries have a higher tendency to live in households with two or more families. Youth born in refugee countries in the 12-17 age group are twice as likely as youth born in Australia to live in households with two or more families (6% of refugee born compared to 3% of Australia born); although it can be argued that in both cases the proportion is low. This was slightly more pronounced with the 18-24 year age group with 11 percent of youth born in refugee countries living in multiple family households compared with 4 percent and 6 percent of youth born in Australia and CALD countries respectively. Research (Beer and Foley 2003)8 has found that overcrowding is not an uncommon characteristic among migrant families.

To some extent, the tendency of youth born in refugee countries to live in multiple family households can be explained by declining housing affordability and cultural norms. Housing multiple families under one roof might be one way for those born in refugee countries to cope with the lack of affordable housing accommodation which is linked to housing prices and rent growing at a faster rate than the household incomes, particularly for low income earners. The lower rates of labour force participation for youth born in CALD and refugee countries indicated in the previous section of this report may also influence these housing patterns. This pattern was also more prevalent in capital cities among youth born in CALD and refugee countries which suggests a link between housing affordability in capital city areas and an increased propensity to live in multiple family households.

Table 17: Proportion of persons living in two or more families household, by age for Australia born, CALD born and Refugee born population groups, all state and territories, 2011

| Youth aged 12-17 | | | | Youth aged 18-24 | | |
|--------------------|------------------------|----------------|-------------------|------------------------|----------------|-------------------|
| | % Australia born | % CALD born | % Refugee born | % Australia born | % CALD born | % Refugee born |
| New South Wales | 3.4 | 5.4 | 6.3 | 4.5 | 7.1 | 10.8 |
| Victoria | 2.2 | 5.0 | 6.8 | 3.1 | 5.9 | 12.0 |
| Queensland | 3.2 | 4.0 | 5.9 | 4.6 | 4.8 | 6.9 |
| South Australia | 1.7 | 3.9 | 5.8 | 2.6 | 4.3 | 8.9 |
| Western Australia | 2.5 | 4.2 | 6.8 | 3.9 | 4.8 | 9.9 |
| Tasmania | 1.6 | 3.5 | 3.1 | 2.5 | 3.5 | 10.8 |
| Northern Territory | 17.9 | 5.4 | 0.0 | 21.3 | 5.8 | 4.1 |
| ACT | 1.5 | 2.9 | 6.9 | 2.3 | 2.4 | 6.5 |
| | | | | | | |
| Capital cities | 2.8 | 5.0 | 6.8 | 3.6 | 5.9 | 11.2 |
| Rest of state | 3.0 | 3.6 | 4.5 | 4.7 | 5.2 | 8.3 |
| Total Australia | 2.9 | 4.7 | 6.4 | 4.1 | 5.9 | 10.8 |

Further, the function of housing in the Western context can be different for some refugee and CALD population groups. For example, living with extended families is the norm for some cultures (eg, Sudanese) which at times is associated with the caring of relatives who might have had lost their parents in conflict back in their home countries (Atem 2011)⁹.

Table 18: Proportion of persons living in a lone person household, by age for Australia born, CALD born and Refugee born population groups, all state and territories, 2011

| Youth aged 12-17 | | | | Youth aged 18-24 | | |
|--------------------|---------------------|----------------|-------------------|------------------------|----------------|-------------------|
| | % Australia born | % CALD born | % Refugee born | % Australia born | % CALD born | % Refugee born |
| New South Wales | 0.5 | 0.4 | 0.1 | 4.4 | 4.2 | 2.4 |
| Victoria | 0.5 | 0.5 | 0.4 | 4.4 | 6.7 | 3.0 |
| Queensland | 0.6 | 0.4 | 0.0 | 4.7 | 4.3 | 3.2 |
| South Australia | 0.7 | 0.6 | 0.9 | 6.2 | 5.1 | 4.9 |
| Western Australia | 0.6 | 0.4 | 0.6 | 5.4 | 4.2 | 2.5 |
| Tasmania | 0.8 | 0.5 | 1.2 | 6.8 | 6.1 | 4.2 |
| Northern Territory | 0.6 | 0.3 | 0.0 | 4.1 | 2.9 | 2.1 |
| ACT | 0.5 | 0.0 | 0.0 | 4.3 | 3.9 | 7.3 |
| | | | | | | |
| Capital cities | 0.4 | 0.5 | 0.4 | 4.1 | 5.1 | 3.0 |
| Rest of state | 0.6 | 0.4 | 0.1 | 5.7 | 4.9 | 3.6 |
| Total Australia | 0.5 | 0.4 | 0.4 | 4.8 | 5.0 | 3.1 |

The proportion of those who live alone across the different population groups in Table 18 underlines the tendency of the refugee born groups to live in single or multiple family households. As Table 18 shows, the proportion of the 18-24 age group of refugee born living in a lone person household was slightly lower compared to the Australia and CALD born groups.

6. Conclusion

It is important for policymakers at the federal, state and local area levels to understand the changing size and composition of its population. This report has focused on youth born in CALD and refugee countries between the ages of 12-24 and made comparisons with youth born in Australia at the state level to identify trends. Population trends at the local area level can fluctuate widely from trends at the national and state level which will have implications for local government and councils when it comes to assessing and planning for the demand and needs for services in their respective area. There are a range of indicators to consider when examining how youth born in CALD and refugee countries are faring in comparison to their Australian born counterparts. This report has focused on their distribution, education, employment and living arrangements. While tables showing the population distribution for youth born in CALD and refugee countries and youth with CALD and refugee ancestry by these variables are shown for SA4 geographical areas in each state and territory in the appendices of this report, in depth analysis of these trends is beyond the scope of this report.

At the state level, the traditional migrant receiving states of New South Wales, Victoria and Queensland are home to the largest number of youth born in CALD and refugee countries and youth with CALD and refugee ancestry, as they are for the Australian population as a whole. However, it is important to note that in the last census, the other states and territories have experienced faster average annual growth rates for youth born overseas compared to youth born in Australia in the 12-24 age group. One of the more significant developments in the international migration landscape for Australia has been the increase in the intake of refugees, and their resettlement in various part of Australia, often outside of capital cities. What we have seen is a growth of the refugee born population across the country not just in the traditional migrant 'gateway city' destinations.

It must be remembered that there is great diversity of ethnicities within CALD and refugee population groups which not only requires a range of differing need and services but also translates into different settlement and distribution patterns that need to be understood more fully. However, it is useful to first assess them more broadly as population groups in order to understand how youth from CALD and refugee countries as new additions to the Australia's population are benchmarked against the Australian born youth population.

When it comes to education, youth born in CALD and refugee countries were analysed according to the 12-17 and 18-24 age group. For the former, it was encouraging to see that youth born in CALD and refugee countries and with CALD and refugee ancestry generally had comparable rates of being enrolled at an educational institution. In fact, youth born in CALD countries and youth with CALD

and refugee ancestry performed slightly better than their Australian counterparts in the 12-17 age. Overall, youth born in CALD and refugee countries and with CALD and refugee ancestry had higher participation rates as students in either a full or part-time capacity at an educational institution when compared to youth born in Australian. While it is considered that the population of youth born in CALD countries partly comprises international students, there is also some evidence that there is a stronger emphasis placed on education for migrant youth.

The inverse relationship between employment and education is apparent for youth born in Australia which has a significantly higher proportion of its 18-24 group participating in the workforce compared to youth born in CALD and refugee countries. This may be attributed to the Australia born population having more options available to them apart from post-secondary education compared to youth born in CALD and refugee countries. However, for youth with CALD and refugee ancestry, whilst their engagement with the workforce was still lower than the Australian born population, it was higher than youth born in CALD and refugee countries. This is an indication of how over the generations different population groups begin to converge towards the Australia born average.

Understanding the living situation of different youth population groups revealed that the majority of all birthplace groups lived in single family households. Youth born in both CALD and refugee countries in the 12-17 age group were comparable to the average for youth born in Australia although there was some variation for the 18-24 age group. Analysis showed that youth born in a CALD country were less likely than youth born in Australia to live in a single family household and that youth born in a refugee country were most likely to live in a single family household. Clearly there are different cultural practices which partly explain the household composition across these groups and as explained, youth born in a CALD country also make up a proportion of temporary international migrants, including international students who tend to live in share housing. Of note is the rate of migrant youth living in a 'two or more family household'; both youth born in CALD countries and refugee countries in the 12-17 and 18-24 age groups had higher proportions living in multiple family households compared to the Australia born population. This suggests that migrant youth, particularly those born in refugee countries might differ in their housing preferences and/or housing options compared to youth who are Australia born, underlining a need to understand the housing situations and preferences of CALD and refugee groups.

International migration will continue to play a key role towards the growth and development of Australia's population and economy, particularly in responding to the challenges presented by its ageing population. As mentioned, this report sought to gain a general overview of the migrant youth according to selected indicators, however it would be useful to further understand CALD and refugee groups across different ethnicities, at more localised levels and assess these population groups across a wider range of social and economic indicators. This would paint a more accurate picture of their experiences and transition in Australia, identify their issues and challenges and would allow policymakers at different levels of government to make informed decisions for service delivery to these groups.

Appendix One: List of CALD Countries

List of countries of birth used to define 'CALD born', 2011 and 2006 Census

* Indicates not available that Census collection period

Appendix Two: List of Refugee Countries

Data from the Australian Census does not currently include any reference to visa status for the overseas born population, as such figures for whole population groups who are considered most likely to be of a refugee status are used here instead. While this is not ideal it is the best proxy we have for census data on this population group. This is not a representative sample of refugee countries; however, the countries listed do represent a more recent snapshot of contemporary refugee countries. The selection of countries to be included for Refugee Birthplace was based only on the countries that featured in the top 10 nationalities for Refugees on the offshore Humanitarian Program from 2001/02 to 2011/12. However, Indonesia and Sri Lanka were excluded from this list due to high numbers of international students from these countries which would confound the population numbers likely to be associated with refugee status.

With regards to selection of countries for refugee ethnicity, selected refugee birthplace countries were selected from DIAC's Country Community Profile: http://www.immi.gov.au/media/publications/statistics/comm-summ/summary.htm

The reflected ancestries for each country as indicated in the census were selected from the respective Community Profiles. Those which had ambiguous ancestries such as English or African were excluded. In addition some ancestries which were not reflected in each community profile but were 'obvious' were included on this list (eg: Anglo-Burmese, Chin, Rohingya (from Burma) and Kurdish (from Afghanistan)).

| List of countries for Refugee Birthplace | List of countries for Refugee Ethnicity (First Response) |
|---|---|
| Afghanistan | Afghan |
| Bhutan | Albanian |
| Bosnia and Herzegovina | Anglo-Burmese |
| Burma (Republic of the Union of Myanmar) | Assyrian |
| Burundi | Bhutanese |
| Congo, Democratic Republic of | Bosnian |
| Congo, Republic of | Burmese |
| Croatia | Burundian |
| Eritrea | Chaldean |
| Ethiopia | Chin |
| Former Yugoslav Republic of Macedonia (FYROM) | Congolese |
| Iran | Croatian |
| Iraq | Eritrean |
| Liberia | Ethiopian |
| Sierra Leone | Hazara |
| Somalia | Iranian |
| Sudan | Iraqi |
| | Karen |
| | Kurdish |
| | Liberian |
